

PUBLISHED.

The Farmers' Library and Monthly Journal of Agriculture for August is now ready. The contents are:

FARMERS' LIBRARY.

LETTERS TO FARMERS ON AGRICULTURAL CHEMISTRY. By ALEXANDER PETHOLDT. (Continued.)

LETTER 1: Source of the Carbon of Plants. Whence do Plants derive their Carbon—from Human or the Carbonic Acid of the Atmosphere?

LETTER 2: The Carbons, Hydrocarbons and Nitrogen of Plants.—of these elements of Plants and the Sulphur and Phosphorus.

LETTER 3: The Inorganic Constituents of Plants.—Aches.

LETTER 4: The Aches of Plants.

SECTION THREE (Continued).

LETTER 5: Source of the Carbon of Plants. Whence do Plants derive their Carbon—from Human or the Carbonic Acid of the Atmosphere?

LETTER 6: The Carbons, Hydrocarbons and Nitrogen of Plants.—of these elements of Plants and the Sulphur and Phosphorus.

LETTER 7: The Inorganic Constituents of Plants.—Aches.

LETTER 8: The Aches of Plants.

LETTER 9: Introduction to the Practical Section of the Course. The Nature, Use, and Effects of Fallow.

LETTER 10: The Nature, Use, and Effects of Fallow.

LETTER 11: Manures. General Remarks upon Manures and Manuring. Division of Manures into Vegetable, Animal, and Mineral Manures.

LETTER 12: Green Manure, Humus, and Plants.

LETTER 13: Animal Manures. Feces, Urine, their Origin, Dung, Fertilizer, and other Animal Manures. Urine, Guano, and Ammonia.

LETTER 14: Mineral Manures. Lime, Sulfuric Acid, Gypsum, various Salts, Man, Irrigation.

LETTER 15: Summary and Conclusion.

APPENDIX. PRINCIPLES OF AGRICULTURE. By Albert D. Tamm—(See Reproduction. See page 160 Farmers' Library.)

MONTLY JOURNAL OF AGRICULTURE.

LETTER 16: PRINCIPLES OF AGRICULTURE.—A Dissertation on Horse-Rearing and on the Training of Horses of the United States! OBITUARY NOTICE OF GEN. T. M. FORBES, of Mo., who died from a Gunshot Wound, at his residence, on the 1st of September, 1841.

LETTER 17: THE CULTURE OF ENGLAND.—The Northern Planter (London) Described.

LETTER 18: DRINKING-WATER IN ENGLAND.—The increasing population in England.

LETTER 19: HOW POPULATED.—An valuable results stated.

LETTER 20: HOW MANAGED.—Management.

LETTER 21: CANCER.—Illustrated.

LETTER 22: CONSUMPTION.—Illustrated.

LETTER 23: THE PRESERVATION OF HEALTH.—The good effects of frequent bathing.

LETTER 24: THE COLD.—An account of the cold climate of the South. (Letter from Thomas Atkinson, Esq., Cor. Secy. of the National Institute, to the Editor of the Farmery Library.)

ADMINISTRATIVE ASSOCIATIONS AND SCIENCE.—What they are doing for Agriculture in England.

TEACHING DRILLS.—The cheapest method of Making and Burning Drills.

DRUGS.—Applied to Agriculture and Horticulture.

EIGHTEEN ANNUAL FAIR OF THE AMERICAN INSTITUTE.—New York State Agricultural Society—Catch Galloping Goose.

THE AMERICAN FARMER.—Baltimore.

GOODS CURRENT.—Plant Watering, Artificial Manures, Agricultural Incubations. The best mixture for filling up Wounds in Trees. Don't allow Rhubarb to Seed!

TERMS.—\$1 a year. Five copies for \$30. Single number 25 cents. Address, F. & M. McELRATH, New-York.

SEVENTH NUMBER of Lardner's Lectures.

The seventh number of this popular and useful work is now ready. This Number contains the Lecture on THUNDER STORMS and describes Common Thunder Clouds, Volcanic Thunder Clouds, Height of Stormy Clouds, Lightning, Speed of Lightning; Silent Lightning; Luminous Clouds; Thunder Phenomena of Thunder and Lightning, &c. &c. &c. The Second Lecture in this Number is on the LATITUDES and LONGITUDES. The next is on the THEORY of Colors. The next on the VISIBLE STARS. And the concluding one is on Water Spouts and Whirl-Winds.

We have not space for a synopsis of the different Lectures contained in this number, but it will be found to contain a variety of most curious and highly interesting matter.

The price is 25 cents. The back numbers may still be obtained. Five numbers for \$1.

HONESTY.—The "Razer Sharp Man," while performing the trials of Justice, yesterday afternoon, took up a pistol which he found to contain some papers and a sum of money which people not having provided with this world's goods could ill afford to lose. He immediately informed the Editor of the Times of his good luck, and the circumstances being made known to the public, the trial was suspended, and the eye of the law, a young lad, who was quite distressed on account of her loss. She immediately offered him a sum dollar as a reward—but failing compensated by the expression of gratitude that beamed in her eyes at the almost hopeless recovery of her money, he requested her to supply it to him. The poor person who had stood in more need of it than he did.

(Boston Journal, Tuesday.)

WE have obtained a specimen of paper made from the borders of Bell Pond. It is strong and of good quality. The manufacturer says it is as good as that made from the stocks which he has at present \$20 per ton. The material will not cost more than one or two dollars per ton. We should suppose that the same might be found in many other places. Those who feel an interest in the subject would do well to examine this article and the locality from which it is obtained. (Worcester, Mass.) Spy.

SANDIE'S SARASATAVIA.—It is well known that many of the mortal diseases of the skin and glands result from infection or impure circulation of the blood, and the particular disease also from the action of the stomach and other vessels which carry the residue resulting by nature in supplying the demands of the animal system. The only stimulant and purifying properties of Sandie's Sarasatavia are its mild astringent properties, rather like saffron and most effective preparation for restoring to the organism its vigor, and giving new energy to the system. It is a safe and reliable medicine, and manifested with signal success in all mortal diseases of the skin and the glands, and other seaceous organs.

SCARLET AND WHITELAW.—F. B. & D. S. SCARLET, 79 Fulton-street, New-York. Sold also at 273 Broadway, 77 East Broadway, and by Druggists generally throughout the United States. Price \$1 per bottle.

ACCIDENT TO THE STEAMER "MISS MARY."—Some time ago, the Massachusetts Capt. Constance, of Boston, was run into by a steamer, the bow-stern striking the steamboat, and so great was the collision that a hole was forced through the boat. At the time of the accident, Capt. Constance was in the cabin, sealing the engine and several of his crew from the water, but the boat was most severely damaged. By the presence of mind of Capt. Constance, he immediately ordered "Come! Come! Extractor!" and the crew having got the boat off the deck of the boat, which almost immediately removed the intense suffering caused by the scalding water. The next day the men were all as usual, attending to their duty, when Capt. Constance, who was in the service of the U.S. Navy, who was in command of the ship, came to him, and said, "We are in no way inferior to you, we can call upon Capt. C. or any man in the hands of whom we have our steamer for a further assistance." Let us hope that their own steamer continues inactive, and price is without improvement. Sales have been made of 100 hds Fusto Rico at 20¢ per cent.; and 20¢ per cent. at St. Croix, 30¢ per cent.

DYEWOODS.—The market generally remains quiet, with a steady moderate business, at previous rates.

THE ATTICA AND BUFFALO RAILROAD COMPANY.—has declared a semi-annual dividend of 5 per cent.
